CLARITY OF THOUGHT.
CREATIVITY IN ACTION.
**IISD's
CLIMATE CHANGE
AND ENERGY TEAM**

www.iisd.org/climate

Since 1992,
the International Institute
for Sustainable Development
has been a leading voice in
the international debate on
climate change.

Recognizing that a changing climate is one of the most serious economic and social challenges facing the planet, IISD promotes solutions that will move economies towards a low-carbon energy future, and help people adapt to changes that are already being felt.

Equally comfortable in board rooms and community halls—north and south of the equator—IISD's Climate Change and Energy Team is uniquely positioned to help influence government policy, corporate strategy and community action. IISD understands that creative responses based on solid research, shared knowledge and the engagement of people at all levels is required to meet the challenge of a changing climate.

CLARITY OF THOUGHT. CREATIVITY IN ACTION.

IISD's CLIMATE CHANGE AND ENERGY TEAM

HOW CAN WE PROMOTE INVESTMENT IN CLIMATE-FRIENDLY TECHNOLOGIES?

CLARITY OF THOUGHT. CREATIVITY IN ACTION.

HOW CAN COUNTRIES, GIVEN THEIR PARTICULAR CIRCUMSTANCES, WORK CONSTRUCTIVELY TO ADDRESS CLIMATE CHANGE?

We believe that the most effective actions are those that promote economic stability, enhance social equity and complement other environmental initiatives. IISD provides these responses through policy and economic analysis; intelligence gathering; impacts assessment and modelling; and public engagement and outreach.

IISD is actively engaged in addressing challenges such as strengthening the emerging global carbon market, helping countries to adapt to the impacts of climate change and the development of a climate regime after the Kyoto period.

The Institute has extensive expertise in the dynamic area of the Kyoto Mechanisms, with a strong focus on domestic emissions trading, the Clean Development Mechanism and greening of investments. IISD's commitment to addressing climate change extends to our status as a carbon-neutral organization.

Our Climate Change and Energy Team also provides insight and understanding regarding the implications of climate change for organizations, communities and governments. The Institute's approach combines physical, economic and policy assessments; identifying vulnerable areas and sectors; and assisting in the creation of appropriate policy interventions and adaptive strategies.

With our breadth of intellectual capacity, depth of understanding and solid experience, IISD is making a difference through creative solutions and sound insight.

ABOUT IISD >

About the International Institute for Sustainable Development >

The International Institute for Sustainable Development contributes to sustainable development by advancing policy recommendations on international trade and investment, economic policy, climate change, measurement and assessment, and natural resources management. Through the Internet, we report on international negotiations and share knowledge gained through collaborative projects with global partners, resulting in more rigorous research, capacity building in developing countries and better dialogue between North and South.

IISD's vision is better living for all—sustainably; its mission is to champion innovation, enabling societies to live sustainably. IISD is registered as a charitable organization in Canada and has 501(c)(3) status in the United States. IISD receives core operating support from the Government of Canada, provided through the Canadian International Development Agency (CIDA), the International Development Research Centre (IDRC) and Environment Canada; and from the Province of Manitoba. The Institute receives project funding from numerous governments inside and outside Canada, United Nations agencies, foundations and the private sector.

HOW CAN MY COMPANY BENEFIT FROM EMISSIONS TRADING?

HOW CAN MY COMMUNITY ADAPT TO MORE FREQUENT DROUGHTS?

WHAT HAPPENS AFTER 2012 WHEN THE KYOTO PROTOCOL EXPIRES?
