

7 principles for a green recovery in Canada

1 Support only companies that agree to plan for net-zero emissions by 2050.

2 Make sure funds go towards jobs and stability, not executives and shareholders.

3 Support a just transition that prepares workers for green jobs.

4 Build up the sectors and infrastructure of tomorrow.

5 Strengthen and protect environmental policies during recovery.

6 Be transparent and accountable to Canadians.

7 Put people first and leave no one behind.
