

The Zero Hunger Private Sector Pledge

Frequently Asked Questions (FAQ) & Guidance Document for Companies

This FAQ and guidance document answers questions for companies about the **Zero Hunger Private Sector Pledge (the pledge)** and is designed to assist companies and investment funds to fill in and understand the commitments to be made in the pledge. It should be read alongside the sample pledge. The pledge commits companies to “align their investments with new evidence and commitments by donors, governments and global institutions, to end hunger and nourish the future by 2030.”

Deciding Whether to Pledge

1. What are we asking companies to do?

We are inviting companies to make a financial commitment in at least one of the 10 high-impact intervention areas based on the new evidence¹ and in at least one of the priority countries or regions. The company also has to name the partners it will work with to achieve the action: these could include one of the pledge-implementing partners (or other international or regional organization, local, regional, or national government) or civil society organization (CSO) that the company is working with. Finally, the pledge requires companies to comply with host state laws and regulations, and commit to internationally accepted principles such as the Principles for Responsible Investment in Agriculture and Food Systems of the Committee on World Food Security (CFS-RAI) and the UN Guiding Principles for Business and Human Rights. See “ Who can sign the pledge?” for further information.

This pledge is a non-binding statement of the company’s proposed investments plans, as detailed in the online form (available [here](#)). It is not intended to create any legally enforceable rights or obligations of the company or its affiliates. The signing of this pledge shall not be deemed to establish either party as the agent of the other party or create a legal partnership or joint venture between the parties.

The signing of this pledge or pledge approval alone does not guarantee partnership with the selected implementing organization or partner and does not constitute any form of endorsement or due diligence clearance by this organization. The partnership is activated—and can possibly be promoted if agreed by both parties—only once a formal binding partnership agreement is signed and in accordance with that partnership agreement.

¹ The evidence comes from a series of new reports, including: [Center for Development Research \(ZEF\)–FAO–IISD–International Food Policy Research Institute \(IFPRI\)–Cornell \(2020\)](#), [State of Food Insecurity in the World \(SOFI\) \(2021\)](#), [Program of Accompanying Research for Agricultural Innovation \(PARI\) \(2020\)](#), and [Ceres2030 \(2020\)](#). In the simplest terms, evidence refers to science-based information about what works and what does not work.

2. What does “align their investments” mean?

Aligning a company’s or investment fund’s investments with new evidence and commitments requires them to either change existing investments, practices, or operations or make new financial investments in a portfolio of interventions.

The table below shows the area for investment, types of investment needed, and examples of company actions that would be considered “aligned investments.” Investments work better using a portfolio of interventions that interact dynamically and achieve multiple objectives rather than looking for a single intervention.

The process to define the list of aligned investments is iterative. The company or investment fund can propose other examples, but they must be aligned to at least one of the three areas for investment, the 10 types of investments needed, and the principle of investing in a portfolio of interventions to achieve multiple outcomes.

Ceres2030 Area for investment	Types of investment needed	Example of aligned company investment
Empower the Excluded	Enabling participation in farmer organisations	Contract with farmers organisations
	Vocational programs for rural youth offering integrated training in multiple skills	Establish programs for young or female farmers that train them on a wide range of skills
	Scaling up social protection programmes	Encourage innovative contract farming that provides multiple services to farmers, and enables them to provide affordable nutritious food to social protection public procurement
On the Farm	Extension services, especially for women, to accompany R&D spending	Support female farmer leadership programs within their value chains
	Agricultural interventions to support sustainable practices that are economically viable for farmers	Provide support to small producers to develop stronger business models for regenerative farming
	Supporting adoption of climate resilient crops	Provide access to climate resilient crops at lower prices through public-private partnerships
	Scaling up farm level interventions in water scarce regions	Support small and medium enterprises (SMEs) with innovation services to supply clean irrigation
	Improving quality and quantity of livestock feed for small and medium scale commercial farms	Support responsible sourcing and testing of livestock feed
Food on the Move	Reducing post-harvest loss by focusing beyond cereals to fruits & vegetables, and other parts of the value chain	Provide a package of technologies and services such as: multi-use, circular, aggregation cool storage units that can be purchased by farmer organisations/ communities; improved access to testing facilities for safety and quality(e.g. aflatoxin); transparent contracts and price premiums for quality produce.
	Infrastructure, regulations, technical assistance and services to support SMEs in the value chain	Provide innovation support to SMEs in the value chain and workforce nutrition programmes

Source: IFPRI

3. What types of financial commitments can be included?

There are four types of financial commitments: (1) core business investments, (2) subsidized contributions, (3) cash contributions, and (4) in-kind contributions.

Core business investments. This is where the greatest quantity of investment should come from. It can take multiple forms and involves direct investments in operations and projects that are aligned to at least one of the 10 investment areas and in at least one or more of the priority countries. For

example, spending USD 50 million to build a factory to produce complementary foods could be counted toward the pledge.

Subsidized contributions. They can take the form of a sale of goods or services to the targeted beneficiaries at a subsidized rate, for example, selling drip irrigation systems or solar panels at a subsidized rate lower than the company’s standard market price. It can also take the form of higher purchasing prices or better packages for smallholders, for example a contract farming scheme that also offers health care coverage or pays a 20% premium.

Cash contributions. They can take place through the company’s charitable activities, and/or environmental, social, and governance (ESG) activities, and can be transferred to a third party or a fund.

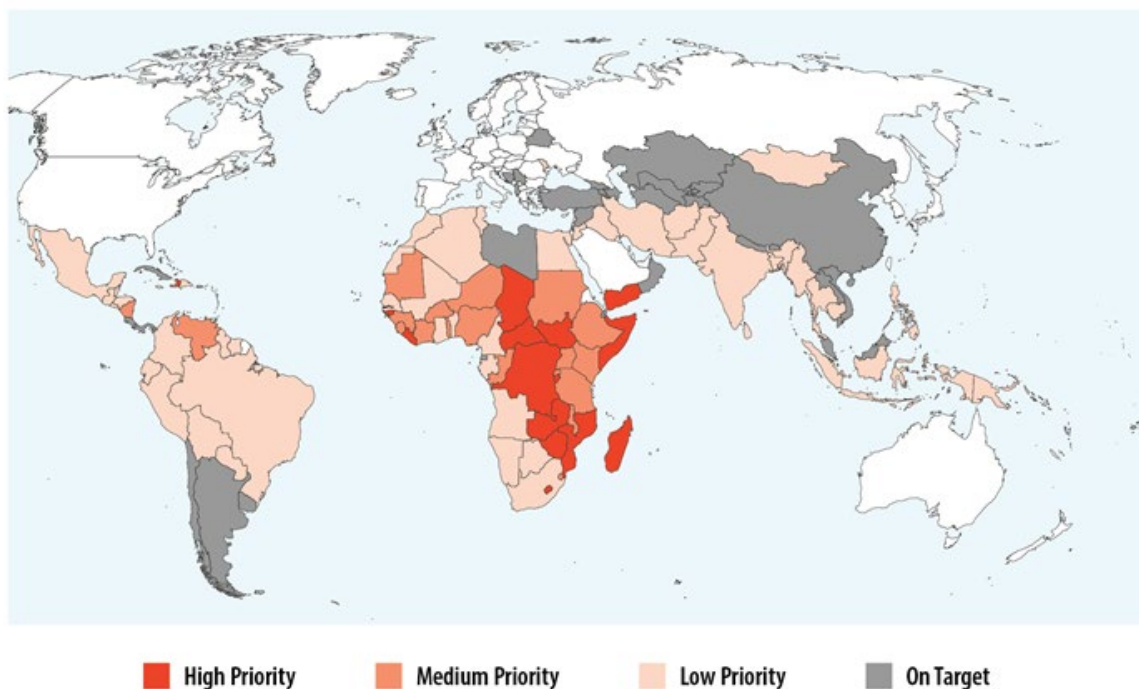

In-kind contributions. They can occur through hiring/assigning employees to implement the intervention (or the provision of goods and services produced by the companies) and are not limited to food companies. All companies in the world contribute to food systems, from airlines to IT services, and are thus eligible to make a pledge. These contributions can also take the form of granting access to knowledge and financial capital. Companies can provide access to patents, IP rights, or databases, and financial firms can provide access to credit, finance, or insurance.

4. Where are the priority countries?

The map of priority countries is below. A list of priority countries is available in Appendix 2 of the Ceres2030 costing brief [here](#).

Africa will need the greatest level of support, followed by South Asia

Priority countries for donor investment based on their dependency on external resources until 2030

5. Do investments need to be new?

Yes. The pledge must include future investments. Past investments cannot be counted toward the pledge commitment. However, if a company made a commitment in 2020 that continues until 2025, it can include all investments that are planned from the date of the signing of the pledge.

6. Who can my company partner or work with to implement my pledge?

Your company must specify which organization or partner you wish to work with to implement the pledge and is free to choose your own implementing organization or partner. We strongly encourage companies to consider working with one of the following organizations to ensure country ownership and alignment with national priorities: the Food and Agriculture Organization of the United Nations (FAO) (Hand-in-Hand initiative); Global Alliance for Improved Nutrition (GAIN); Grow Africa; Grow Asia; International Fund For Agricultural Development (IFAD); One Acre Fund; World Economic Forum (WEF) (Food Action Alliance); and the World Food Programme (WFP).

Any contribution to or cooperation with our recommended implementing organization shall require a written binding agreement. The signing of such an agreement shall be conditional upon the formalization of all relevant conditions and successful completion by the company of any due diligence requirements.

Implementing organizations reserve the right to decide not to partner with a company at any point, including if the company fails to comply with the governing principles of the pledge. The company shall maintain the confidentiality of any information it receives from an implementing organization that has been designated as confidential. It shall use information received in respect of this pledge only for purposes of the pledge and not for any private or commercial gain.

Companies that do not select one of our recommended implementing organizations or partners must ensure that their implementing partners are working closely with the government or one of our organizations to ensure country ownership and alignment with national priorities.

7. Who can sign the pledge?

Companies that sign the Zero Hunger Private Sector Pledge shall comply with the governing principles of the pledge, namely:

- They must comply with applicable laws, rules, and regulations, including those applicable in the country(ies) they pledge to support and all other countries where they are based and operating, if any.
- Through their business operations, they should commit to internationally accepted principles, including the Principles for Responsible Investment in Agriculture and Food Systems of the Committee on World Food Security (CFS-RAI), the International Code of Marketing of Breast Milk Substitutes, the Principles of the UN Global Compact, and the UN Guiding Principles for Business and Human Rights.
- They should be committed to aligning their investments and business operations more clearly and strongly with SDG 2 (Zero Hunger) and contribute to efforts to end hunger by 2030 in one of the priority countries.
- They should be committed to fulfilling their pledge by partnering with governments, donors, and global institutions to make evidence-based investments that contribute to food systems transformation in that country through tangible contributions to specific projects.
- They will be guided by this country's priorities for hunger reduction as recorded in their official documents, including their food system pathways and national development priorities and strategies.

- They should be able to report on resources allocation, progress, impacts, and challenges in the context of the agreed collaboration.

8. How does the pledge support country ownership and alignment to national priorities?

Country ownership and links to national priorities and needs represent the recipe for success of the pledge. The main mechanism for ensuring this is through implementation with the identified organization or partner and in collaboration with existing platforms, coalitions, and initiatives. Further work will be done on the mechanisms for delivery that can facilitate and support better public–private alignment to achieve impact. This will include effective coordination with international organizations (African Development Bank [AfDB], African Union Commission [AUC], FAO, IFAD, International Monetary Fund [IMF], World Bank, and WFP) as well as country-level consultation and implementation which is fundamental to delivery. This will be tailored to national circumstances, led by governments.

9. Does it count if my company is part of another initiative like the UNFSS Business Declaration, G7 commitment, FAO’s Hand-in-Hand, WEF’s Food Action Alliance, etc.?

A pledge participant must fill in and sign the pledge document to be part of the Zero Hunger Private Sector Pledge. The pledge works closely in partnership with these other private sector initiatives, and we strongly encourage companies to be part of these initiatives as a way to implement their pledge commitments.

The UN Food Systems Summit (FSS) Business Declaration is the overarching commitment made by companies as part of their engagement in the summit. The pledge documents will be added as an addendum to the Business Declaration.

Companies from G7 countries that sign the Zero Hunger Private Sector Pledge will automatically meet the commitment needed for the G7 initiative, based on the role that the World Benchmarking Alliance (WBA) will play in benchmarking and reporting progress.

Practical Issues

10. How do I fill in my company’s pledge?

We have prepared a table in the sample pledge to help companies fill in their different projects and calculate their contributions. Below are some examples of in-kind and cash projects that would be applicable for the pledge.

Ceres2030 area for investment	Types of investment needed (evidence drawn from scientific reviews published in Nature & CGE modelling)	Aligned company investments (examples)	Financial contribution (USD/EUR/other)
Empower the Excluded	Enable participation in farmers organizations	Project Amata Responsibly sourced vanilla	EUR XXX
	Investment in education, training, and vocational programs for rural youth		EUR XXX
	Scale up social protection programs		

On the Farm	Investment in extension services and research and development (R&D), especially for women	The Realigning Agriculture to Nutrition (RAIN) Programme	EUR XXX
	Agricultural interventions and innovation to support sustainable practices		
	Support adoption of climate-resilient crops		
	Scale up farm-level interventions in water-scarce regions		
	Improve quality and quantity of livestock feed for small and medium scale commercial farms		
Food on the Move	Reduce post-harvest loss by focusing beyond cereals to fruits & vegetables, and other parts of the value chain	From papaya waste to dried fruit snack A dairy supply chain for nutritious yogurt	EUR XXX EUR XXX
	Invest in infrastructure, regulations, technical assistance (TA) and services to support small and medium-sized enterprises (SMEs) in the value chain		
		TOTAL (USD/EUR/other)	EUR XXX
		TOTAL (USD Equivalent)	USD XXX

11. How long can a company pledge for? 1 year, 5 years or 10 years ...

Companies are free to decide the length of their pledge.

12. Can you recommend projects that my company can invest in?

Yes. Our recommended implementing organizations are available to work with companies to identify opportunities for investment. A database of eligible projects is available on request for companies seeking opportunities to pledge toward existing initiatives. This database will be made publicly available on the pledge website after the summit.

13. Who do I send my pledge document to?

Pledges can be sent to Carin Smaller, IISD csmaller@iisd.org and Anouk De Vries, GAIN adevries@gainhealth.org. After the launch of the pledge, there will be a dedicated website and email address where companies can submit their pledges.

14. What happens after I sign the pledge?

Once an institutional home is decided and established for the pledge (see question: What is the Institutional Home after the UNFSS?), a verification committee will be created to review and pre-approve pledges within 72 hours.

If your pledge is approved, your company will be contacted to further discuss, detail, and formalize the terms of your proposed investment plan with the selected implementing organizations. This shall provide you with the opportunity to further define the supported project aligned with national priorities, and agree on the exact collaboration mechanism, reporting modalities, and communication plan. The parties will then be able to agree on a formal binding agreement, subject to the implementing organization’s due diligence and other requirements.

15. What is the timeline from now till the summit?

We are asking companies to signal their intent to pledge. Those that have signalled their intention to pledge will be listed and mentioned at the launch session on September 21.

From August 1, 2021, until the UNFSS we will be working with companies to fill in their pledge documents.

The pledges will be announced at the UNFSS, and we will hold a special media event on the sidelines. During this event, we will launch the Zero Hunger Private Sector Pledge, which will enable companies to continue pledging after the summit.

16. What is the timeline after the UNFSS?

An annual Pledging & Reporting Conference will provide a regular opportunity for companies to pledge new commitments and showcase the results from the past pledges. The initiative will sunset in 2030.

17. What is the media plan?

Media engagement is intended to increase awareness of the Zero Hunger Private Sector Pledge as a corporate commitment to end hunger. It is delivered through a collaborative effort of participating organizations supported by GAIN and the International Institute For Sustainable Development (IISD). For the pre-Summit, the initial digital teasers will be shared to start building momentum. However, the main focus remains on the summit itself to ensure newsworthiness and “big moment” attracting top international media. Media strategy will be executed with a hub-and-spoke approach. It means development of the assets and toolkits centrally with a strong central media push supported by each organization’s own engagement. The following assets are being produced: video material, social media cards, narrative document, press release, template text for newsletters, and key speaking points. Communications group gathering participating organizations will ensure alignment and impact of the activities.\

18. Can I promote my intended collaboration with specific organization(s)?

Because the pledge does not constitute a binding commitment or a guaranteed partnership with any organization, companies signing the pledge cannot communicate or make any public statement, including on social media, about their plan to partner with or support a specific organization unless they have received express consent from that organization.

In case a company and organization agree to communicate about their planned collaboration, the company should not use the logo, name, or any agreed abbreviation of any other implementing organization associated with the Zero Hunger Private Sector Pledge, nor establish any linkage, direct or indirect, to such organizations in external communications and public statements.

Communication on the intended collaboration is to be agreed at a later stage with the implementing organization, after the exact collaboration modalities and a communication plan have been agreed by all relevant parties and upon required due diligence clearance and signature of a formal binding agreement with the implementing organization(s).

Institutional and Governance Issues

18. Whose idea was the pledge?

The Zero Hunger Private Sector Pledge is a game-changing solution that emerged from the UNFSS Action Tracks and is supported by Agnes Kalibata, Special Envoy for the UNFSS and by Professor Joachim Von Braun, Chair of the Science Group.

19. Who is supporting the pledge?

The pledge is currently being coordinated out of Action Track 1 of the UNFSS. The partner organizations are: FAO, GAIN, Grow Africa, Grow Asia, IISD, WBA, WBCSD, and WFP.

20. What happens after the pledge is signed?

The pledge is a non-binding statement of the companies' proposed investment plans. It is not intended to create any legally enforceable rights or obligations on the company or its affiliates. After the pledge is signed, the company will work with implementing organization or partner to convert the pledge into specified terms for the proposed project and investment plans and ultimately into a binding agreement, subject to the company undergoing the applicable due diligence process and any other organizational requirements. The Term Sheet Template is available below in Annex 1.

21. What are the reporting and accountability requirements?

The company or investment fund commits to providing annual progress reports to the Pledging & Reporting Conference. The reporting includes information about implementation underway, challenges, investments made, and impact achieved. The reports will be based on existing best practice and reporting standards, such as the CDP Protocol and the Global Reporting Initiative's forthcoming Agriculture and Aquaculture Standard.

WBA will monitor progress against the company's investment area as part of the broader benchmarking assessment of the Food and Agriculture Benchmark.

The 10 high-impact investment areas identified by Ceres30 align closely with several of the indicators in the [WBA's 2021 Food and Agriculture Benchmark](#) (FAB), which could be used to track companies' progress on the pledge. There are 10 FAB indicators that directly link to the 10 investment areas:

- (i) B3. Protection or terrestrial natural ecosystems
- (ii) B6. Soil health and agrobiodiversity
- (iii) B8. Reducing water withdrawal
- (iv) B9. Reducing food loss and waste
- (v) C1. Availability of healthy food
- (vi) C2. Accessibility and affordability of healthy food
- (vii) C5. Workforce nutrition
- (viii) D14. Gender equality and women's empowerment
- (ix) D22. Health and safety of vulnerable groups
- (x) D23. Farmer productivity, resilience, and access to markets

Annex 2 provides an initial mapping of the 10 FAB indicators against the 10 Ceres2030 investment areas. Some indicators within the benchmark capture a wide range of activities and programs and may be used to track progress on several investment areas. Implementing organizations reserve the right to require and offer additional reporting parameters.

22. What is the governance structure?

The starting point is the pledge document. Pledges will be added to a centralized database and sent to the identified organization or partner for follow-up and implementation.

Companies that were not able to pledge at the UNFSS can pledge at any time after the UNFSS until the end of 2030. There will be a dedicated website with an online tool for companies to pledge at any time until the end of 2030. There will also be a bi-annual Pledging & Reporting Conference.

After a company has signed the pledge, it should be turned into a more detailed plan for implementation, either using the term sheet below or through another instrument. The term sheet is developed for the purposes of setting out the terms of the proposed investment to outline the proposed responsibilities and contributions of the parties. Once all approvals have been obtained and pre-conditions met, the relevant parties shall enter into a binding agreement.

23. What is the institutional home after the UNFSS?

To date, no institutional home has been selected. The question of the institutional home remains an ongoing discussion with partners. One option is to select a single institutional home, such as at the FAO, Private Sector Mechanism (PSM) of the CFS, World Business Council for Sustainable Development (WBCSD), or WEF. A second option is to create a standing committee comprised of a group of partners that will continue to shepherd and drive the pledge forward until 2030. The standing committee could be comprised of the following partners: FAO, GAIN, Grow Africa, Grow Asia, IISD, PSM of the CFS, WBA, WBCSD, WEF, and WFP.

Annex 1. Term Sheet Template

Term Sheet Template

Proposed Investment by [*Name of the company*] (the "**Company**") in [*Name of Country*].

This term sheet summarizes the principal terms of a proposed investment by the Company in [*Nature of investment*] in the [*Location of investment*] in [*Name of Country*]. The term sheet is developed for the purposes of setting out the terms of the proposed investment to outline the responsibilities and contributions of the parties and the public announcement of the investment. Once all approvals have been obtained and pre-conditions met, the parties shall enter into a binding agreement (the "**Agreement**").

1. Company	[<i>Name of Company</i>]
2. Investment amount	[<i>Amount</i>]
3. Partners	Government of [<i>Name of country</i>] commits to: <ol style="list-style-type: none"> [<i>Policy commitments</i>] [<i>Infrastructure commitments</i>] [<i>Land commitments</i>]
	Farmers/MSMEs [<i>Name of Managed Service Provider, cooperative society, or farmers organization, MSME</i>] Commits to: <ol style="list-style-type: none"> [<i>Production commitments</i>] [<i>Input obligations</i>] [<i>Social commitments</i>]
	Development Partner(s) [<i>Name of development partner(s)</i>] commits to: <ol style="list-style-type: none"> [<i>Technical assistance commitments</i>] [<i>Infrastructure commitments</i>] [<i>Training & skills transfer commitments</i>] [<i>SME development commitments</i>]
4. Investment purpose	[<i>Describe the nature of the investment the company is making</i>], e.g., « <i>The company will build a greenfield processing plant on a 15-hectare plot of land provided by the government and sign production contracts with five Farmer cooperatives</i> »]
5. Governance	[<i>Describe the structure of the investment</i>], e.g., <i>The company and the government will form a joint venture company (JVC) which will be the vehicle for implementing the investment. The JVC will be managed by the company and undertake the construction and operation of the plant.</i>
6. Dependent transactions	[<i>Describe the role of all other parties in making the investment effective</i>], e.g., <i>The investment is conditional upon the following:</i> <ol style="list-style-type: none"> <i>The government promulgating policies/regulations and or plans to develop public infrastructure identified to support the investment</i> <i>The government providing the company with title to the land for construction of the processing plant</i> <i>Development partners signing agreements with farmer representatives to provide technical assistance to formers</i> <i>Farmers representatives signing production agreements with the company</i>

	<p>5. <i>Development partners signing an agreement with the government to provide funding for infrastructure that will support the investment</i></p> <p>6. <i>Appropriate SME's being identified for support by government and development partners to provide services to various actors in the value chain in support of the investment</i></p>
7. Impact estimates	<i>Provide details on estimated impacts, including number of jobs to be created, including for women and youth, transfer of technologies, transfer of skills, local business development, community engagement, etc.</i>
8. Confidentiality	<i>The terms and existence of this term sheet are confidential and will not be disclosed by the undersigned except as otherwise agreed in advance by each of the parties hereto.</i>
9. Conditions to closing	<i>The signing of the Agreement and will be conditional upon the formalization of all the dependent transactions in Paragraph 6 above and the successful completion by the company of any due diligence requirements.</i>
10. Timing	Negotiations: Due Diligence: Signing Term Sheet: Announcement: Signing Agreement: [date] [date] [date] [date] [date]
11. Governing law	This term sheet, as well as the final agreement, shall be governed by [Name of Country] law.

Annex 2. WBA Reporting on the Zero Hunger Private Sector Pledge

Empower the Excluded

1. Enable participation in farmers' organizations

Elements	FAB indicator(s)
Enable participation in farmers' organizations through, for example, contracts with these organizations.	<u>D20. Forced labour</u> The company eliminates and prevents forced labour in its operations and supply chain. Note: This includes ensuring the right to collective bargaining and freedom of association in the value chain.
	<u>D23. Farmer productivity, resilience, and access to markets</u> The company supports the resilience, productivity, and access to markets of farmers and fishers, especially small-scale producers.

2. Invest in vocational programs for rural youth that offer integrated training in multiple skills

Elements	FAB indicator(s)
Programs that offer training in multiple skills to rural youth show promise in increasing employment levels and wages among the program graduates, creating new possibilities for income	<u>D23. Farmer productivity, resilience, and access to markets</u> The company supports the resilience, productivity, and access to markets of farmers and fishers, especially small-scale producers.

3. Scale up social protection programs

Elements	FAB indicator(s)
Interventions to remove barriers in accessing markets, education, credit, and other economic opportunities.	<u>D23. Farmer productivity, resilience, and access to markets</u> The company supports the resilience, productivity, and access to markets of farmers and fishers, especially small-scale producers.

On the Farm

1. Investment in extension services, particularly for women, must accompany R&D programs

Elements	FAB indicator(s)
Extension services accompany R&D programs, particularly for women, e.g., through supporting female farmer leadership in the value chain.	<u>D23. Farmer productivity, resilience, and access to markets</u> The company supports the resilience, productivity, and access to markets of farmers and fishers, especially small-scale producers.
	<u>D14. Gender equality and women's empowerment</u> The company publicly commits to gender equality and women's empowerment and discloses quantitative information on gender equality and women's empowerment.

2. Agricultural interventions to support sustainable practices must be economically viable for farmers

Elements	FAB indicator(s)
Provide economically viable agricultural interventions to support sustainable practices, e.g., by providing support to small producers to develop stronger business models for regenerative farming.	<u>D23. Farmer productivity, resilience, and access to markets</u> The company supports the resilience, productivity, and access to markets of farmers and fishers, especially small-scale producers.
	<u>B6. Soil health and agrobiodiversity</u> The company is adopting sustainable production and sourcing practices that improve soil health and increase agrobiodiversity.

3. Support adoption of climate-resilient crops

Elements	FAB indicator(s)
Supporting the adoption of climate-resilient crops, e.g., by providing access to climate-resilient crops at lower prices through public-private partnerships.	<u>D23. Farmer productivity, resilience, and access to markets</u> The company supports the resilience, productivity, and access to markets of farmers and fishers, especially small-scale producers.

4. Increase research on water-scarce regions to scale up effective farm-level interventions to assist small-scale producers

Elements	FAB indicator(s)
Scaling up farm-level interventions in water-scarce regions, e.g., by supporting SMEs with innovation services to supply clear irrigation.	<u>B8. Reducing water withdrawal</u> The company is reducing water withdrawals across its operations and supply chain.
	<u>D23. Farmer productivity, resilience, and access to markets</u> The company supports the resilience, productivity, and access to markets of farmers and fishers, especially small-scale producers.

5. Target improvements in the quantity and quality of livestock feed to small and medium-sized commercial farms

Elements	FAB indicator(s)
Improving the quantity and quality of livestock feed to small and medium-sized commercial farms, e.g., through supporting the responsible sourcing and testing of livestock feed.	<u>B6. Soil health and agrobiodiversity</u> The company is adopting sustainable production and sourcing practices that improve soil health and increase agrobiodiversity.
	<u>B3. Protection of terrestrial natural ecosystems</u> The company demonstrates that it is achieving conversion-free operations and supply chains for its high-risk commodities.
	<u>C1. Availability of healthy foods</u> The company commits to, and delivers on, proportionally increasing the availability of healthy foods.
	<u>C2. Accessibility and affordability of healthy food</u> The company addresses food insecurity by improving the accessibility and affordability of healthy foods.
	<u>D23. Farmer productivity, resilience, and access to markets</u> The company supports the resilience, productivity, and access to markets of

	farmers and fishers, especially small-scale producers.
--	--

Food on the Move

1. Reduce post-harvest losses by expanding the focus of interventions beyond the storage of cereals to include more links in the value chain and more food crops

Elements	FAB indicator(s)
Reducing post-harvest loss by focusing beyond cereals to fruits and vegetables, and other parts of the value chain.	<u>B9. Reducing food loss and waste</u> The company is reducing food loss and waste.

2. Invest in the infrastructure, regulations, services, and technical assistance needed to support SMEs in the value chain

Elements	FAB indicator(s)
Investing in the infrastructure, regulations, services, and technical assistance needed to support SMEs in the value chain, e.g., by providing innovation support to SMEs in the value chain and workforce nutrition programs.	<u>C5. Workforce nutrition</u> The company has a workforce nutrition program that prioritizes making healthy foods the standard in the workplace.
	<u>D23. Farmer productivity, resilience, and access to markets</u> The company supports the resilience, productivity, and access to markets of farmers and fishers, especially small-scale producers.
	<u>D22. Health and safety of vulnerable groups</u> The company identifies and addresses health and safety risks to vulnerable groups in its supply chain.
