

IISD Experimental Lakes Area Database Update Schedule

Notes:

- Not all datasets are listed here yet. Email eladata@iisd-ela.org for other information.
- Update dates are only targets (not guaranteed), and may change without notice.
- In some cases, certain parts or parameters of datasets may not be available until later.

Data Theme	Dataset	Update Date
Limnology	Bathymetry	Late November or early December (present year's data)
Limnology	Profiles (R.B.R. data)	Late December (present year's data)
Limnology	Ice dates (on/off)	Late January (previous year's data; ice off from May, ice on from November)
Biology	Phytoplankton	Late January (previous year's data)
Limnology	PAR profiles	Late February (previous year's data)
Limnology	Kd (light extinction coefficient)	Late February (previous year's data)
Limnology	Field observations (secchi, colour, epi. depth, therm. depth...)	Late February (previous year's data)
Meteorology	Daily precipitation (rain/snow/trace)	Late March (previous year's data)
Meteorology	Evaporation pan (including wind)	Late March (previous year's data)
Biology	Fish (capture/recapture)	Late March or early April (previous year's data)
Hydrology	Hydrology (four datasets: water level and water discharge - daily and hourly)	Mid April (previous year's data)
Chemistry	Chemistry of water samples	Late April or early May (previous year's data) - usually with some parameter exceptions
Biology	Zooplankton	Late April to late August (previous year's data)
Meteorology	Snow depth on ground (mean from 10 rulers)	Late May or early June (previous winter, i.e. start of present year and end of previous)
Limnology	Ice depths (ice and snow on lakes)	Late May or early June (previous winter, i.e. start of present year and end of previous)
